Sir:

In response to the office action dated August 21, 2001, the following remarks are provided for consideration:

REMARKS

In response to the "restriction requirement" in the above-referenced application, applicants elect, with traverse, Group V (claims 3-8, 12, 13, 15-17 and 19-23), drawn to a method of treating PMDD comprising administering a gestagen, drospirenone, and an estrogen, ethinylestradiol.

It is noted that the "restriction requirement" is, in effect, a combination of a) a restriction requirement between a method comprising the administration of a gestagen alone, and a method comprising the administration of a gestagen and an estrogen; and b) a requirement to elect a species from the genus of gestagens and a species from the genus of estrogens. Compare, e.g., the
